

# WiZARD 510

# Sleep Comfortably, Quietly, and Safely.

Individuals with sleep-disorder breathing can experience improvements in their sleeping quality as quickly as two weeks of positive airway therapy and significantly reduce daytime sleepiness and its impact on quality of life. Factors such as properly minimizing breathing obstruction incidents, improving mask comfort, and reducing the risk of pressure sores, air leakage around the cushion, claustrophobia, nasal congestion, and additional complications from frequently treatment sessions drastically impacts therapy compliance.<sup>1,2</sup>

WiZARD 510's human-centered design for maximum stability and comfort, unobstructed vision, minimal noise, and easy maintenance simplifies the therapy process, improving user experience and long-term adherence to positive airway pressure therapy.

### Comfortable

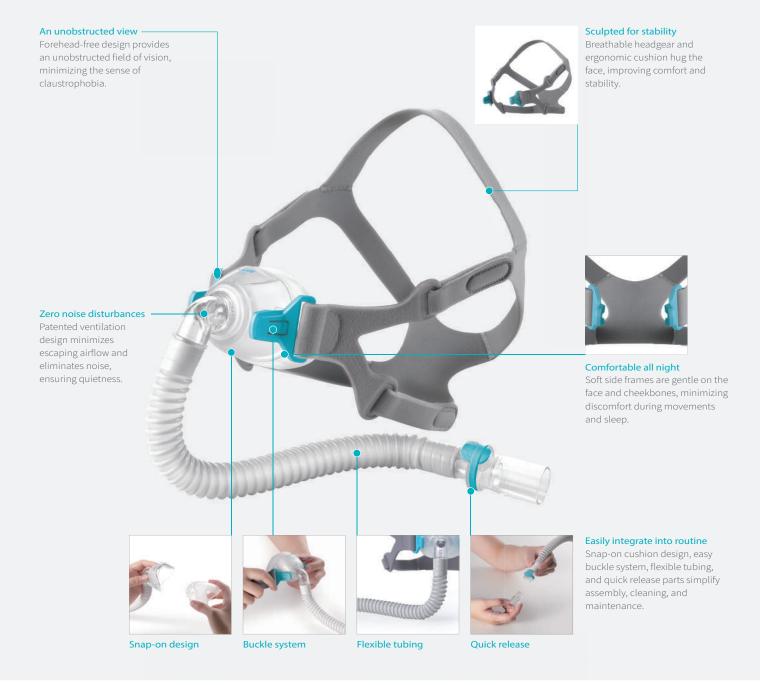

Continuous comfort allows users to stay asleep all night and wake up without markings on the skin.

## Clear eyesight

Users can enjoy leisure activities while receiving steady air pressure with a fitted mask.

# Increasing freedom during CPAP therapy, improving user comfort, experience, and sleep quality.

### Quiet

A full night's sleep for the user and their partner is much easier without noise and air leaks disruptions.

### Simple

Simple cleaning and storing keeps process hassle-free, helping users develop good maintenance habits.
